

System Platform Services Bundle

Wonderware System Platform

Wonderware System Platform represents multiple closely associated and integrated Wonderware server products as a base system for multi-node Supervisory, SCADA and MES/EMI solutions. System Platform is a combination of strategic application services, built on Archestra technology. It can be applied to manufacturing and industrial information or automation applications. System Platform contains an integral core set of capabilities and services to support sustainable production and operations performance improvement for consistent and reliable operations across processes to protect brand integrity.

Installation Requirements

Professional services are required to implement the base system. Wonderware Midwest offers a set of predefined and standardized services around the installation, configuration and implementation of System Platform. These services are required for end users and system integrators with new applications who do not have sufficient prior experience. Additional services may be necessary as described below. Days are presumed to be eight (8) hours, on-site, during normal business hours. Travel and accommodations for the Wonderware Midwest engineer are additional and billed at the current consulting rate.

+ Base Software Installation

- 1 Days (R):
 - + Install and configure Galaxy Repository
 - + Install and configure Historian
 - + Install and configure two (2) Application Object Servers
- Additional half day (4 hours)
